1. Refrigeration System By matching and balancing hydrocarbon refrigeration with the latest refrigeration components, TRUE engineers environmentally friendly refrigeration systems with shorter run times, lower energy consumption, and the industry's coldest holding temperatures. TRUE has taken a large step in reducing its carbon footprint with the use of a hydrocarbon refrigerant, R290. R290 is an environmentally friendly refrigerant with a Global Warming Potential (GWP) of 0.02, compared to refrigerants of the past, R404a and R134a, whose GWPs are 3922 and 1430 respectively.

2. Quality Components TRUE uses quality components to ensure a long life of refrigeration with minimal energy consumption. State-of-the-art components such as energy-efficient compressors and electrically commutated motors are used to exceed energy standards without sacrificing the workload. LED lights have been introduced in TRUE units to offer a brilliant display while saving energy and reducing heat within.

3. Self-Cleaning (RCU) Technology eliminates the need to clean the condenser coil, reduces energy consumption and helps maintain the coldest temperatures and freshest products..

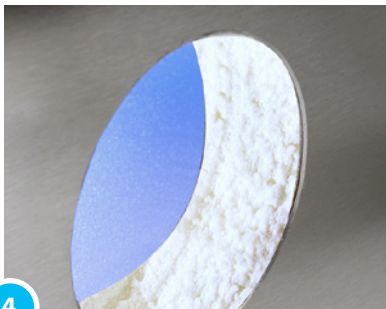

4. High-Density Insulation TRUE continues its commitment to sustainability with the use of foamed-in-place, CFC-free, polyurethane, high-density insulation that provides unparalleled strength and rigidity. In addition to our already industry exceeding insulation factor, our insulation has zero ozone depleting (ODP) and zero global warming potential (GWP).

5. Durable PVC Coated Shelving True manufactures its own heavy-duty wire shelves, utilizing larger diameter steel for strength. Shelving is bonded with powdered PVC to prevent chipping and peeling which is prevalent in standard epoxy coated shelves.

6. After Sale Support Along with its Warranty. At no additional cost, our customers enjoy the option of having the entire condensing unit replaced. This consists of a new compressor, condenser, start components, and fan motor, all of which are pre-assembled and shipped from the factory.

4

5

6

7. Energy Efficiency TRUE is committed to eco-friendly manufacturing by meeting and surpassing energy standards while not sacrificing performance. By using oversized, higher-capacity, balanced refrigeration systems, TRUE outperforms industry efficiency expectations.

8. 100% Run Testing In order to verify that all units are manufactured properly and to spec, TRUE runs tests on every single unit as part of the final quality inspection before releasing the unit into the finished goods inventory.

9. Extensive Availability In its Missouri-based manufacturing facilities, TRUE builds for inventory to provide a near 100% fill rate on standard items. This allows for the most optimal turnaround when the purchase order is received and processed.

MODELS

BENEFITS

- Double front bars and high side walls prevent bottles from tipping. Back bar prevents bottles from leaning against the back wall of cooler.
- Single glides offer flexibility to display multiple packages on the same shelf.
- Easy to install. TrueFlex® glides snap on to standard wire shelves, making it possible to retrofit older coolers equipped with flat shelves.
- Includes shelf retainer clips that keep shelves from sliding into door. Eliminates zip ties and service calls.
- Enhanced silicon "slip" agent improves gravity feed performance.
- Optimum air flow ensures rapid pull down to serving temperature.
- Can be ordered with the cooler and shipped inside the unit for one stop shopping..

True Stripe signs are standard on all GDM models.

Plain white, plain black, and stainless steel signs are available upon request on most models.

Alternative signs are shipped from the factory and are available at no charge if indicated at the time the order is placed. If a sign is ordered after the unit leaves the factory, an upcharge will apply.

Custom signs and graphics are available. Please contact the factory for details and pricing.

True stripe graphic available for all models

Upcharges may apply.
Availability of models may vary.
